## SUMMARY

Senior Product Designer with 8+ years of experience in digital product design, including 5+ years on complex B2B and B2B2C products. I lead end-to-end product design from discovery and information architecture through interaction design, prototyping, and design systems. I also build what I design: I ship production front-ends in HTML, CSS, and JavaScript and work in React and Next.js. Currently focused on AI-SaaS and ERP systems, including POS, turning complex business workflows into clear, usable products.

## EXPERIENCE

**TwentyToo** | USA (Remote) Dec 2023 – Present
*Senior Product Designer*

- Lead end-to-end product design for a B2B AI-SaaS platform, turning complex model capabilities into clear, usable workflows.
- Designed the platform's AI chat agent experience.
- Built the UI style guide and a reusable library of 96 components, making design-to-dev handoff faster and more consistent.
- Designed the onboarding and activation flows for the early-stage product, iterating on them with product and engineering as the platform grows.
- Work with product, engineering, and data teams to match what the models can do with what users actually need.

**Reach Link** | Kuwait (Remote) Jan 2023 – Dec 2025
*Senior Product Designer (full-time, part-time from Dec 2023)*

- Led design for a B2B2C influencer–brand marketplace and a B2C/B2B link-in-bio platform, from discovery to launch.
- Designed two-sided campaign creation flows for influencers and brands, used by 223 creators and 27 brands.
- Designed performance dashboards and an events system with QR check-in.
- Defined the design system guidelines used across both products to keep design and development consistent.

**Automated Systems Company** | Kuwait Jan 2022 – Jan 2023
*UI/UX Designer*

- Redesigned operational workflows for Kuwait Airlines, cutting task completion time by 20%.
- Designed a full hospital management system end to end, including patient admission and appointment scheduling.

**Medica Healthy** | Egypt Apr 2021 – Dec 2021
*Product Owner & UI/UX Designer*

- Owned the product backlog and UI flows for a medical app, website, and web portal, from feature definition to release.

**The Tailors Dev** | Egypt 2019 – Mar 2021
*UI/UX Designer*

- Designed landing pages and admin dashboards, and delivered high-fidelity prototypes for client sign-off.

**Spree Media** | Egypt 2016 – 2018
*UI Designer*

- Designed interfaces for web products at a media and marketing tech company.

**OMNAS** | Egypt 2014 – 2016
*Web Designer*

- Designed and built client websites with HTML and CSS.

## PART-TIME & PROJECT WORK

**Misbar Pro** | KSA (Remote) Jun 2026 – Present
*Senior Product Designer*

- Designed the full Primex POS system for restaurants and retail end to end, shipping in 4 months on a team of two; now live with 2 clients.
- Designed and built the Primex marketing site in HTML, CSS, and JavaScript, from layout and motion to production deployment.
- Handled Arabic (RTL) layouts across the product, including cart, invoice, and dashboard screens.

**Pleny** | UAE (Remote) Apr 2026 – Sep 2026
*Senior Product Designer*

- Led design for a food social network app.
- Restructured and improved the design system for the Android app, including a new onboarding theme.

**Geeks** | Jordan (Remote) Nov 2022 – Nov 2025
*UI/UX Designer*

- Designed Dopa, a travel and activities app with a web dashboard.
- Designed Jamal, a car rental app and website.

**Talentera (bayt.com)** | UAE Mar 2025 – Aug 2025
*Product Designer (Project-based)*

- Led the design of the Talentera events landing page, from content structure and layout to final UI.

**TAS ERP** | Egypt Dec 2022 – Jun 2025
*UI/UX Designer*

- Designed enterprise ERP modules for inventory, HR, and finance.

## SELECTED BUILDS

**Primex** — primex.studioerp.com · HTML · CSS · JavaScript
Marketing site for the Primex POS product, designed and built from layout and motion to deployment.

**Personal portfolio** — yehiamourad.github.io · HTML · CSS · JavaScript
A one-screen canvas styled like a design file, where each frame opens a case study. Designed and built.

## SKILLS

**Product design:** AI-SaaS UX · ERP & POS systems · Design systems · Interaction design · Product discovery · Arabic (RTL) interfaces

**Design engineering:** HTML · CSS · JavaScript · React · Next.js · Tailwind CSS · Framer Motion

**AI workflows:** Agentic design workflows (Claude + Figma MCP, custom AI skills) · Figma AI

**Tools:** Figma (components, variables, auto layout) · Git · JIRA

## EDUCATION & CERTIFICATIONS

B.A. in Al-Da'wah, Al-Azhar University (2007 – 2011)
Google UX Design Foundations · Designing Web & Mobile Interfaces (Howard Pinsky)
